Teeth Whitening

Full Mouth Restoration

Dental implants are a surgical component that is implanted into the jawbone below the gum line. After that, an artificial, natural-looking tooth is attached to it. The artificial tooth bonds with your natural bone over the span of a few months and offers extra stability. Implants have the appearance of a real tooth.

Using the most innovative technology in dentistry today, Invisalign uses a series of comfortable, removable, transparent aligners to gradually straighten your teeth. Why wait another day to take the first step toward straighter teeth and a more beautiful smile? Contact our office and ask us about Invisalign.

In Mississauga

Many of us feel that our smiles are most striking when our teeth look especially white, but unfortunately, soft drinks, coffee, tea, and tobacco can leave behind ugly stains over time. To help you restore your gleaming, bright white smile and to give you an added boost of confidence, we offer many options, such as custom whitening kits.

In Mississauga

Severely worn down, missing, or badly damaged teeth can truly have a detrimental effect on one's ability to chew or to feel comfortable in social situations. Teeth marred by neglect, lack of care, and improper dentistry often require a comprehensive restorative treatment.
